**Skin contact:** For skin contact, wipe away excess material with dry towel. Then wash affected areas with plenty of water, and mild soap if available, for several minutes. Get medical attention if irritation occurs.

**Eye contact:** In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.

**Most important symptoms and effects, both acute and delayed (if relevant):** No further information available.

**Indication of any immediate medical attention and special treatment needed:** Notes to physician: Treatment based on sound judgment of physician and individual reactions of patient.

---

## 5 FIRE FIGHTING MEASURES

**Flash Point:** > 200 °C

**Sensitivity to Mechanical Impact (Y/N):** NO

**Sensitivity to Static Discharge (Y/N):** Sensitivity to static discharge is not expected.

**Suitable extinguishing media:** In case of fire, use water fog, foam, dry chemical, or CO<sub>2</sub>.

**Special Fire-fighting Procedures:** Containers can build up pressure if exposed to heat (fire). Fire involving large amounts of material should not be approached because individual containers may rupture abruptly causing "fireball" effect. Fire-fighters should wear self-contained breathing apparatus and full protective clothing when fighting chemical fires. Use water spray to cool nearby containers and structures exposed to fire.
